

Choose your room.

What is it?

Includes all of the functionalities of the Digital Twin.

After booking, the client chooses the specific room of their stay. They can find the room by flying over the hotel or by attribute filtering and see the views from the balcony of each room.

Improve your extra incomes.

For selecting the room by payment by B2B

Hotelverse.

Increase your extra incomes and engage your clients.

The power of choosing your room

Benefits for the hotel.

Boost the upselling, engage your clients and disintermediate your sales.

- Increase post booking upselling by showing the available rooms on the digital twin.
- Generate new income sources by charging your intermediated clients for choosing their room.
- Improve customer loyalty by offering a highly added-value service.

Benefits for the client.

Uncertainty disappears, personalizes their stay and guarantees their room assignment.

- Uncertainty of room location inside the resort disappears (close to the swimming pool, or the buffet, or the miniclub,...).
- Knowledge of the views that they will have and room assignment guarantee.
- Hyper personalization by attributes (bed type, living room, room size, noise level, sunlight,...).

Benefits for partners.

Become more relevant for the hotel with the Hotelverse integration.

Booking Engine. Improve conversion rate by informing about the possibility of choosing the room after completing the booking.

PMS. Be part of an innovative added-value service.

CMS. New premium functionality integrated with the PMS.

Most Requested
